

Article 6 – Civil Engineer I Position

- Interns hired for past 5 years for engineering and GIS
- In-house engineering and project management
 - Reduces reliance on consultants = cost savings
 - Assist and provide expertise to all divisions of DPW and other Town departments
- Increased need for capital improvements and maintenance due to aging infrastructure
- GIS mapping and updates, AutoCAD drafting, water system modeling, RFP/Bid preparation
- Stormwater permit inspections
- \$8,000 stormwater wages line item reduced to \$0
- One Example:
 - Birch and McDowell Water and Drain project – intern performed survey, engineering design, bidding, shop drawing review in-house. Estimated cost of a consultant ~\$35,000
